

Distributor of lead-acid batteries and Supplier of Alternate Energy Solutions

# COMPANY PROFILE

## INTRODUCTION

Mzansi Mashala is a 100% broad-based BEE company that has been established to provide lead-acid batteries to the market in both the public and private sectors of the Southern Africa economy. We have aligned our business with Dixon Batteries, a local battery manufacturer who has been supplying the South African Market for over 50 years.

*Directors: W. Likotsi, H Mathebula, P Mahlatsi*

We have a edge over competitors in the market as our business relationship with Dixon Batteries, and having direct involvement in the manufacturing process gives us the confidence and technical knowledge to distribute and supply batteries and related products to the market.

## MISSION

The mission of Mzansi Mashala is to be the largest distributor of quality lead-acid batteries to the Southern African market focusing on developing and maintaining excellent customer relations.

## VISION

Our vision is to become a preferred supplier of batteries to the South African market for automotive, alternate energy and leisure use.

## PRODUCTS

We stock and supply a complete range of lead-acid batteries for automotive and leisure applications. Our product range include the following:

- A full range of low-maintenance lead-acid batteries.
- A full range of sealed-maintenance free batteries
- A full range of motorcycle batteries
- A range of Deep-cycle batteries for solar and leisure

## SERVICES

Using battery technology, we have the ability to provide alternate energy to power a number of devices and equipment to help reduce the destructive impact of electricity production on our planet. Our services include:

- Design, configuration and installation of solar heating solutions
- Design, configuration and installation of solar lighting solutions

## QUALITY

All batteries we supply are manufactured to stringent quality standards. Dixon Batteries manufacturing processes are aligned to the ISO 9001: 2008 quality management system. We are confident that all batteries supplied have passed the most stringent quality testing before reaching our customers.
